

ABOUT THIS — AND — ABOUT THAT

By OLIVER GEDEIST

Disagreements

Candidates Stassen and Dewey Monday night gave a demonstration that might well be used by millions of us who "zet mad" when there is disagreement. They debated upon a question about which it seems to me there can be no question. Mr. Stassen wants to outlaw communism as a party—claims that restrictions imposed by a bill now in Congress effectively eliminates a communist party, if the law is enforced.

Governor Dewey insists that exactly the contrary is true. He also insists the idea that in our freedom-loving country no party should be outlawed, although there is accepted evidence that the idea back of the party is subversive.

But the thought here is that these gentlemen, greatly at odds upon the issue, speak like gentlemen, act like gentlemen, meet in debates, never "get mad" about their differences, and, as a result, bring enlightenment to the country.

There is a definite likelihood that one of these men will be president of the United States next year. Their vigorous presentation of their viewpoints in sober fashion indicates that the country will be safe with either of them guiding the ship of state.

Atomic Progress

Uncle Sam announces that three new atom tests at Eniwetok have been highly successful. That is good news and that is bad news. For a "civilization" as old and as good as we consider ours to devote its energies in developing "killing" instruments is a sad commentary upon the common sense of the human race. It's time that we resorted to methods that would lead to the end of war. But we are not likely to TRY that.

If we had only a few men in public life who would forget party advantage and risk defeat in setting up a pattern for peace and fair international association, there would be at least a possibility of doing something worth while. But, apparently, that, too, seems too much to expect.

The New "Israel"

The new state of Israel has been recognized by the United States. Whether that will turn out to be another error by Mr. Truman in seeking to attract Jewish votes is too early to determine. Few will believe that he was actuated by any motive other than political, although wanting to beat Mr. Stalin's recognition may have been in the President's mind. Israel, set up on a basis of religious and racial importance, will have a hard time of it. This country should stay out of it. Those who favor Israel have that right, unless they jeopardize the United States by their actions.

In Turmoil

The world is in turmoil. But that is not surprising. Lack of educational foundation makes us as weeds before the wind—we are blown this way and that by our political leaders and our prejudices, make our decisions in anger at others, and open the road wider to our destruction.

SHOOFLY CAMPAIGN AGAINST FLIES MAY REDUCE NASTY ANTAGONIST

"The only good housefly is the dead one." Although this expression isn't new, there is something new about the fact that this year many Illinois communities, including ours, are out to see that there will be nothing but "good houseflies" in the community at the end of the season.

An intensive program is under way to eliminate the common housefly, known as one of the filthiest of insects. Flies breed around barnyards, privies, garbage dumps, putrifying animal carcasses, and other foul-smelling materials. Then the flies discover human food, upon which they crawl in seemingly great glee and deposit thousands upon thousands of germs.

Each year the lives of many people are endangered as a result of fly-borne infection with such diseases as tuberculosis, typhoid fever, cholera, dysentery, diarrhea, possibly polio, and many other human diseases. Germs are carried on the body hairs, wings, and mouth parts of the fly, as well as in the alimentary canal. Flies

Her spirit ever brave,
Her courage high
Will spur us on
To every try
For greater heights.
That pattern of her life
Will ever grow

DANCE TO AID 40 AND EIGHT ORLAND WORK

The name 40 and 8 is familiar to most people. The organization has an interesting story back of it. It has a reputation as funmaker at American Legion conventions.

The 40 and 8 has another function. That is, helpfulness. This is illustrated in the Orland Park Convalescent Center, where former veterans unable to work but not sick enough to enter one of the regular veterans' hospitals, are given care.

Money must be raised, of course, and Voltaire No. 796 plans to raise funds for the Convalescent Center at a dance at Saenger hall, Tinley Park, Saturday night, May 22.

All funds after expenses will be devoted to the maintenance of the Orland Convalescent Center. Dancing starts at 8 o'clock with Marvin Bettenhausen's 9-piece band.

The first county fair ever to be held in Chicago received added stature with the announcement by fair officials that \$39,000 in premiums would be offered to winning exhibitors of livestock, agricultural products, poultry, flowers, and other farm and home products during the spectacular Cook county fair at Soldier Field August 27 through September 6.

Orville F. POPPY DAY

Poppy Day has a sacredness about it that's missing from the usual "tag day" put on all too often. For the good it does, Poppy Day "tagging" could come oftener, and then we could no fulfill our obligation to the veteran who gave so much for their country.

There is a spiritual value to Poppy Day. The soul of man glorified by deeds is memorialized every time we place a dime or a quarter in the containers offered to us by Legion and VFW ladies on Poppy Day.

In a sense, Poppy Day is OUR day—when we can in a small way, however big theonation, render honor to the boys who got where they are and in the condition they are in by fighting our battles for us. We honor ourselves when we make possible the therapeutic values received by them when they are occupied, in hospitals, in making the POPPIES sold on POPPY DAY. Poppy Days in Semmler Newspaperland are as follows:

Mokena and Frankfort and New Lenox, Friday, May 21—give generously.

Oak Forest, Saturday, May 22—give generously.

Orland Park, Saturday, May 22—Give generously.

Spring Accessories Reflect New Trend Toward Femininity

By Ertta Haley

EVEN if you have to remodel your dresses and coats for the season, you won't be able to resist some of the new accessories. They're designed to delight the womanly heart for they're as gay, light and feminine as you please.

Those of you who are older will delight in their lovely old-fashioned look because it will remind you of younger days. Those of you too young to remember other fashions and other days will adore their picture-book loveliness.

There are hats for every face and every fashion, there are billowy white, crisp blouses that smell of soap and water freshness and shoes that are slenderizing and dainty.

Gloves Will Match Colors of Rainbow

New gloves in every color of the rainbow give a bright promise to the fashion outlook for spring.

Not only are leather gloves being shown in the traditional white and pastels, but in all shades and variations of reds, blues, greens and browns. The early forecast favors butter yellow, Balenciaga tan and beige. Yellow should be particularly good with navy outfits, perennial season favorite.

Pastel pink and blue, bright red, gold and purple are expected to be preferred colors. All shades will come in doeskin, suede and glaze.

In line with the general trend in fashion—now called the "Right Look"—American leather glove manufacturers have designed gloves to make the hand smooth, pretty and feminine. They are soft and dressy with slim lines.

Fresh white gloves will, as always, step out ahead in the fashion

parade, and this year many women will want to use high colored or white gloves to dress up a fall or winter suit they are wearing on cool days.

Smartest styles in gloves for spring are either very long or very short. Some of the elbow length gloves are long and slim and can be worn pulled up or crushed down to the wrist. Gauntlet styles with wide flaring cuff to be worn over the suit sleeve continue to be fashionable.

Gay suede or glaze (capeskin) "shortie" gloves make an excellent choice to complement a suit. Newest trend in "shorties" is cuff interest, a button trim or a turn back cuff of contrasting leather or color.

Open Crown Hats, Sailors Are Popular

The gay, trim sailor is one of the most popular hats of the season, and goes very nicely with your suits, of course. You'll see some of the sailor hats freshly sprigged with flowers or eyelet to suit your fancy. Another hat that is seen often is the open crowned hat with gay flow-

ers, and this is especially good for spring. If you already have one of these, the flowers can be changed, and it will be ready for a new season. There are many flowers available, and some of them are of soft, real-looking chiffon.

There are some large picture hats available, and then, too, the close fitting cloche type sprigged with a gay flower has taken a turn toward real simplicity.

Simplicity Favored In Bags and Belts

You'll find that the large oversized bags are still out of the picture and the trim, tailored type of bag is high in fashion. As always in spring, patent leather is favored, and this patent may be carried on further in a wide belt on your costume.

Among the novelties in bags, you'll find that straw woven affairs are coming in to give the wearer a more casual type of bag with her informal prints.

No return is seen of the shoulder type bag, so it's a good idea to dis-

card yours, if you have one, in favor of the more feminine pouch types being favored.

Hose still remain dark, but there are some pastel hose coming to be used with light prints. A lovely pink shade is being shown as well as some shades of green and blue, but these latter two are rather dark. The really dark shades are favorites with suits.

Daintiness, Femininity Mark New Footwear

Shoes are dainty and feminine, according to the forecast. Lines in shoes are long and slender with graceful heels and intricate ornamentation. Generally speaking footwear has climbed higher as hemlines have fallen.

If you're conservative, choose the simple, unadorned pump with closed heels and toes. You'll find no stubby toed shoes, for this is the season for tapering toelines.

If your foot is long and built to carry a lot of shoes, wear shoes built high on the instep. There are multi-colored effects, two-tone or ombre shading and shoes with more than one texture to break the length.

To slenderize the ankles, you may wear the high-riding vogue mentioned above. Pumps and ties that climb high about the ankle also achieve this effect. The bottee fashion is good, and the new slenderizing lasts are good for the ankle. A narrow forefoot, achieved from tapering or pointed toes also helps give the illusion of all-over slenderness.

Be Cautious in Wearing Ankle Strap Shoes

Unless you have slim and beautiful ankles, do not buy ankle strap shoes. But if you do have them, you may wear them for they are high fashion. The more slender the ankle, the wider may be the strap effect. Choose the tapering rather than the pointed toes.

In ankle strap shoes, you'll be seeing dressy ones, tailored ones, colored and plain.

Low cut vamps are good this season especially if you can boast a high instep. In this case, it is wise to avoid ornamentation or sharp lines that detract from the instep.

Be Smart!

When grandma was a girl, no special occasion costume was complete without spike heels. Now, they're one of the newest and very fashion-important features of the 1920's revival. You'll be meeting them especially in suave styles with their newer, narrower effects.

In fiscal 1949 Illinois' share of federal expenditures is \$3,546,000,000. At the same time it will spend \$319,000,000 for all state activities. So it will cost Illinois taxpayers eleven times as much to support the government in Washington as it will to support the government in Springfield.

McLaughry School

Work was begun Monday on insulating the attic of the school.

The board of education in its regular meeting Tuesday began consideration of what to do in the face of the rapidly increasing numbers of school children living in the district, as shown by the recent school census.

Already 58 children are registered for entry in the first grade, and it is thought there are others to register. There will be two first-grade rooms next year.

The census indicates that, without any further growth of the community,

there will be an average enrollment in first grade each year of not less than 75 children through the next six years. Barbara Pierce, a former Midlothianite, now program secretary of the YM-CA in Kankakee, was a week-end guest of Dolores Bunch of Markham.

The village board of Markham will meet this Thursday evening.

Orville Newton and family returned Monday from Minong, Wis. They dropped in and spent some time with Don Minore and family in Minong, former residents of Markham.

Mr. and Mrs. Jack Henslee and son Jack left for Knoxville, Tenn., to visit Mr. Henslee's parents, who are celebrating their golden wedding anniversary.

Permanent Prosperity Is Possible for U. S. Farmers

Economists, farmers, politicians, business men all over the country are properly concerned with the continuing prosperity of the farmers of American states. This has been demonstrated with various schemes and laws, none of which has proved satisfactory to farmers and others, since all have been based upon programs of indefinite nature. The parity system is not perfect and is subject to changing economic and political theorists and parties.

Most farmers would prefer an equal opportunity with other businesses instead of makeshift programs. Most farmers also know that there would be small surpluses if every person in the United States had ENOUGH to eat at all times at a fair price. Perhaps distribution problems have much to do with the present condition—certainly the profit problem involved in distribution of farm produce is the controlling factor.

Granted that the profit factor is responsible for much of the lack of ample food for millions of our people, it is a plain fact that there is little we can do under our present system to correct the situation short of federal gifts to the "submerged" groups. Such a gift program properly would be rejected by all but the indigent-shiftless type of people. Still, with all our wisdom born of experience since the founding of this nation, we must find a way, and find it soon.

It is a simple thing to visualize the vast value to farm producers if everybody worked at profitable wages. But our varying system of ups and downs never will produce such results. Then, isn't it important that we find a way that will produce constant prosperity at good wages and reasonable prices? Isn't it necessary that we turn to a program that will set up world-wide as well as nation-wide demand for our farm products with no deep valleys of losses? The answer, of course, is yes. But how can this be done?

Let's check up. Let's see why we sell so little abroad under normal conditions. Let's look at the populations of the world and see if the people in the world could offer us a market for our farm products. Let's admit right now that people in other countries who work for two or three cents a day (our money) or even fifty cents or a dollar in our money cannot buy much from us. We buy their cheap products under our tariff systems, but the producers "over there" do not get the tariff money.

Let's see. If workers all over the world were paid wages equal to wages paid her for comparable work (less a differential equal to shipping charges to the United States), those other one billion eight hundred and fifty million persons would become earnest seekers for farm produce from this country and earnest seekers for the products of our manufacturing plants.

It's as simple as that. And the setting up of such a system would have another value. It would start thousands and thousands of people in the "backward" spots of the world to developing plants and farms never thought of in their neighborhoods before. It would give to the increasing millions and millions of people in the world work to do and the ability to buy and buy and buy. It would give to the world a foundation for peace among nations and assure the banishment of war for perhaps as long as two hundred years.

With the power now held by the United States in the wide world it would be possible to force the backward nations of the earth into the program upon penalty of selling nothing in this country and in cooperating countries until an international minimum wage basis had been adopted and comparable wages actually paid to workers.

There is the only hope of the American farmer and millions of our own underfed, undernourished people.

From where I sit ... by Joe Marsh

Take Your Choice, Neighbor!

The missus — who writes our Woman's Column in the *Clarion* under the name of "Nancy Gale" — gets letters about recipes, advice on etiquette, home management, etc.

One letter she got last week was about a recipe she published for Welsh Rarebit—made with tart cheese, Worcestershire, and a cup of sparkling tangy beer. "Turned out great," says her correspondent. "But you didn't mention what beverage to serve with it. Should I serve beer? Cider? Iced tea?"

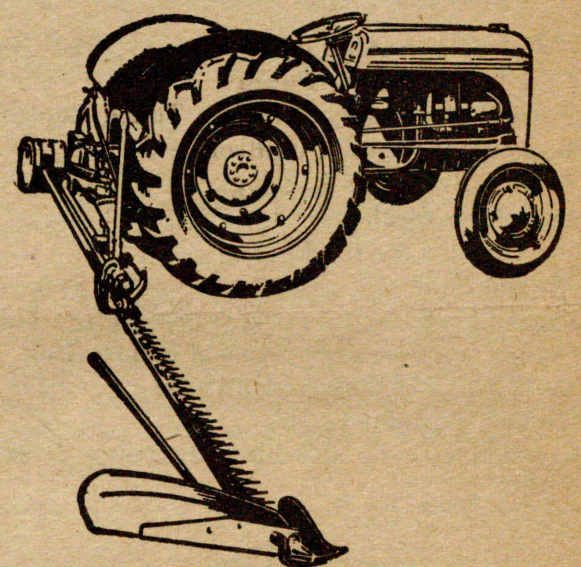

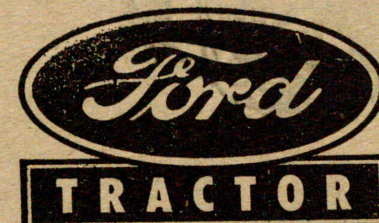

The missus' answer was simply:

"Any beverage your guests prefer. You don't have to serve cider—any more than you have to serve beer ... but it's often courteous to let guests have a choice."

From where I sit, that simple answer applies to more items than Welsh Rarebit. In a world where everyone has different tastes and ideas—we should recognize those differences—and never deny the right of choice to anyone!

CARD OF THANKS

Our sincerest thanks and gratitude to the Volunteer fire department for their courageous work and efforts in saving our home from complete destruction.

Unfortunately, with the high winds, the entire south side of the roof was fire, thus ruining the entire second floor.

We especially desire to compliment the men on their carefulness in not the time to remove the rubble, and taking instead of moving storm windows, in many cases, taking them.

For more thanks to the department the covers nailed on the roof, giving us the assurance we would be protected from rain.

Also our gratitude to the many wonderful men and women who came in and helped save our belongings from water and smoke. Also many thanks to our splendid neighbors who came in and removed all bedding to take it home to be laundered.

We especially want to say thanks to the Brueggemann and O'Neill families for their kindness in giving us their home until we were able to return home.

Also, more thanks to those who labored so hard bailing water from second floor, thus saving us from more destruction.

Wish it were possible for us to thank each one individually, so to all we say, thanks to a grand crowd of folks.

Gratefully yours,
FRANCES AND CARL GALLINA

The Temple in the Nation's Life

Lesson for May 23, 1948

OUR golden text is "O come, let us worship and bow down; let us kneel before the Lord our maker." Psalms 95:6.

Dr. Newton

The Jewish temple was a national sanctuary, whether we think in terms of the altars of Abel, Noah or Abraham, the tabernacle at Sinai, or the great temples at Mount Moriah, of Solomon, of Zerubbabel, or any of the other appointed places of meeting with God. The welfare of mankind, in every age, requires the faithful and frequent worship of God.

From the days when they sang the hymns of David, the Jews were prosperous to the degree that they were true to God in their worship and in their reverence for all things holy. This lesson traces the story, leaving no doubt in any pupil's mind about the solemn truth of the golden text.

A HOUSE OF WORSHIP

IN Ezra 3:10-13, we see the picture of priests leading the people to sing unto the Lord. "Because he is good, for his mercy endureth forever toward Israel."

Wherever you live, whether in the city or in some quiet rural community, remember this, the sanctuary measures the attitude of the people of such community toward God to a degree that no other gage of public opinion can offer. We have our various polls of public opinion, but none of them are so prophetic of a people's ultimate hope as their attitude toward God's house.

Boys and girls who regularly attend Sunday school and public worship will be watched by the men who are looking for trustworthy leaders tomorrow.

HONORING GOD'S HOUSE

"SERVE the Lord with gladness, come before his presence with singing," Psalms 100:2.

We read how the people in the long ago brought their best gifts to make God's house beautiful. What are we doing with our best gifts? I think of boys and girls today who are helping with their small gifts to erect and equip beautiful houses of worship. Tomorrow they will point with gratitude and thanksgiving to the part they had in making God's house the best house in the community. Thus do we honor God as we honor his house.

WHY WE GO TO CHURCH

MR. WANNAMAKER, the merchant prince, was once asked why he went so regularly to church. He replied:

"I go to church for two main reasons. First, because God commands it; second, because it enriches life."

The Jews teach us, in the long record of their faithfulness or unfaithfulness, that the people who go regularly to church are the most dependable people in any community. And we can bring it right down to our day and generation, and get the same answer.

A business man told me recently that he had a check made of the several hundred young people in his employ, and he found that more than ninety per cent of the regular church-goers were advancing in their work with his company. He further discovered that almost without exception, the people who were giving trouble were the people who never entered a church.

OUR NEED OF PUBLIC WORSHIP

OUR bodies require regular nourishment. And our souls are just as dependent upon regular nourishment. I would not say that it is absolutely necessary for one to attend public worship to grow spiritually, but the odds are entirely against those who claim that they can grow spiritually without attending public worship.

There is a place of worship within the reach of well-nigh every person in the United States. We are responsible before God if we neglect to claim the advantages and blessing of public worship.

The place of the temple in the life of Israel is a symbol which teaches us today that we dare not forsake the assembling of ourselves on the Lord's Day in his house. The fellowship of worship is the sweetest fellowship on earth. It is our surest road to peace here and hereafter.

Currant Bushes

By MRS. ESTHER VAN WIE

Question? How far apart should young currant bushes be planted?

Answer: About four feet apart. What insect, bug, or what is it that worst pest attacking currant bushes and what is the remedy for it?

Answer: The currant worm. Powdered hellebore dusted on the plants is a good remedy, but bushes should be watched carefully as soon as the foliage becomes hard. Ordinarily road dust, air-slaked lime, or any fine dust may be used as a spray. It should be applied in the morning, early, or very late covering when foliage is damp with dew. There is some danger in using a liquid insecticide because of small fruit, almost impossible to wash off.

SELF-SERVICE GAS

Self-service gas stations with 18 to 20 pumps at high-traffic corners on main routes are doing well in Los Angeles. Customers like the five-cent-less-than-regular price even though they have to drive to the rear to help themselves to air and water, wipe their own windshields.—Pathfinder.

FEAR PLANNED SETBACK

Uncertainty about how far government authorities may go in an attempt to check inflation on a limited planned recession now is disturbing bankers, business men and the stock market. A planned setback, even under favorable conditions, is likely to turn into a major slump. Today's domestic and foreign situation will make it hazardous despite careful planning.—Pathfinder.
